Since January this year I have been working with NHIT in developing an Education Plan and Strategy for Hāua. The first stage has been based around an Environmental Scan looking at data and stats and what things look like at the moment and where we are at.

The next phase of mahi is about giving our uri an opportunity to share their voice, in regards to Education. Your dreams and aspirations. Your views, opinions and concerns. You may also have ideas around solutions and ways that may address the concerns. This information is confidential, if you wish to put your name to it that is great.

With this information all will be considered as we work toward developing an Educational Plan and Strategy for Ngāti Hāua.

I appreciate your time in sharing your views and thoughts regarding Education.
